

Our American Navy

Serge suits, for men, require no effort to sell them. They sell themselves, for anybody can see at a glance that they are just what we represent them to be—the very best serge suits in America for the price.

Twelve-Fifty.

It is an absolutely ALL-WOOL, fast color serge. Cut in the latest correct fashion, well and thoroughly tailored, and made to fit better than any other ready-to-wear garments in town. No other clothier can duplicate them under \$15 to \$18. Nor can the custom shops produce as good under \$22.50 to \$25.

ROBINSON & CHERY CO.
12th and F Sts. N. W.

ELDON SUBURBAN HOME.
Built of the best material, by day labor. Has rooms and bath, city water, gas, sewer, (oil) fireplace, roll-in bathtub, edge-grain doors, tiled fireplace, handsome mantels and beautiful carpeting. Located on a beautiful lot, with beautiful coping, steps and walks. The lot is 18 feet wide by 100 feet in depth, to a 15-foot alley, shaded by a beautiful grove. The location is near the Soldiers' Home, in the Petworth subdivision. In the brightwood electric car line.
For particulars apply to

L. P. SHOEMAKER,
920 F Street N. W.

A New Shoe Department.

In answer to the steadily increasing demands of our patrons we have been compelled to branch out—open a shoe department. That's what we are here for—to please you—and it's the sole reason for going into this new field. The services of a corps of skilled shoe salesmen have been secured—who will be pleased to serve you every want in the matter of footwear. Right at the opening of the new department we can offer the men the most extraordinary shoe value of the season—a fitting start. While in the market buying for the new department the shoe buyer came across a maker who was willing to dispose of his surplus stock at a big sacrifice—and he was quickly snapped up. Thus it happened that we can offer you the choice of men's finest patent leather shoes, in all the most fashionable shapes—made of the finest selected stock—the most stylish footwear of the season—which was intended to sell at \$4 a pair—for

\$1.95.
To keep the men's clothing department extraordinarily busy today we offer you the choice of Men's Fine Crash Suits, in all sizes, which are as perfect fitting as any garments made—the most comfortable warm weather clothes a man can wear—and that sell regularly at \$25 for only

\$1.95.
We also offer a choice of a lot of Men's Alpaca Coats for hot weather wear—perfect fitting and splendidly made—which are worth \$25 for only 75 cents.

Cheapest Clothing House in the World.

GAS APPLIANCE EXCHANGE
1234 New York Ave.
Washington, D. C.

Decorated by the Emperor.
Mr. D. W. Stevens, counselor of the Japanese legation, has received from his Majesty the Emperor of Japan, the second order of the Rising Sun. This order has been conferred upon one other foreigner, and is given to those only upon whom his Majesty wishes to confer a mark of his favor.

Mr. Stevens has been connected with the Japanese foreign office a number of years, and has had several other orders conferred upon him, including the third order of the Rising Sun, and the second of the Sacred Treasure.

SCIENTISTS AS SOLDIERS

Electricians and College Professors to Lead Engineers.

A BRIGADE IS FORMING

It is thought that the First Regiment of Engineers will be drilled at Peekskill and will then be sent to Cuba—Many Records of National Reputations.

New York, June 1.—When the Brigade of Engineers, United States Volunteers, is mustered in, it will have among its officers, electricians, civil, mechanical and topographical engineers of national repute, college professors and men prominent in the commercial world. Such rapid progress has been made toward recruiting the brigade that a sufficient number of men for the First Regiment has been enrolled, and the other regiments are well advanced.

Col. George L. Gillespie, of the Corps of Engineers, United States Army, who has been in charge of the engineering work in New York harbor for years, and who was recently appointed brigadier general of volunteers, will probably command the brigade. Col. Eugene Griffin, first vice-president of the General Electric Company, with whom the idea of forming volunteer engineer corps originated, will be colonel of the First Regiment. Col. Griffin is a graduate of West Point. He served in the Engineer Corps in the civil war and attained the rank of captain. He retired to private life years ago, but through patriotic motives he decided to accept a commission as colonel, and to take part in the engineering work of the army. He is now only 1 per cent. In the French, German and British armies the engineers are 3 per cent of the entire strength.

Special legislation was passed authorizing the formation of a brigade of engineers, who were named a board of examining applicants for commissions and for places in the ranks of the First Regiment, began their work on the seventh floor of the armory building yesterday.

Among the men who were examined as to their fitness for officers and who passed the mental and physical tests were William Barclay Parsons, chief engineer of the Rapid Transit Commission; Dr. Louis Duncan, professor of electrical engineering in Johns Hopkins University; Eugene Ellis, secretary of the University of Pennsylvania and topographical and hydrographical engineer of the United States Coast Survey for a year; E. M. Sawtelle, chief of the United States Quartermaster General Sawtelle, and Allan Raymond, of the Engineer Corps, U. S. A. Men who have been associated with Col. Griffin in organizing the regiment and who will probably be among its officers are Capt. G. W. Bramwell, Capt. Ira A. Walker, David L. Hunt and Lieut. Rodman.

From these names it may be inferred that the brigade will be formed of men of a high order of intelligence and specially adapted for engineering work. Each regiment will have fifty-three commissioned officers and 1,106 enlisted men, a total of 1,159. The bill authorizes the formation of the three regiments, provides that the officers shall be selected for their skill in the different branches of engineering and their ability to superintend such work as bridge building, mine laying and telegraph construction.

The enlisted men will be taken from every branch of mechanical skill. There will be engine drivers, blacksmiths, machinists, electricians, telegraphers, photographers, carpenters, plumbers, railroad men, riggers, boatmen and those skilled in the use of tools and machinery. The men will be uniformed, armed and equipped the same as the engineer troops of the regular Army.

As soon as the officers have been selected and commissioned by the President and confirmed by the Senate, the men who have been enrolled at the headquarters of the First Regiment in this and other cities will be sent to the headquarters of the First Regiment at Peekskill, where they will be given the rudiments of military drill in order to establish discipline, and they will then be ready for service in Cuba or wherever they are wanted.

ELECTION OF OFFICERS.

International Typographical Union
Selecting New Leaders.
An election was held yesterday in the several chapters of Columbia Typographical Union No. 17 for officers of the International Typographical Union.

It was the first time in the history of the organization that the election for national officers was held under the referendum plan. The election was held at the headquarters of the union at 12th and F streets, where a very small number of voters were present. So far as the local union is concerned it is expected that only about two-thirds of the whole vote was cast.

The election committee was busy last night tabulating the returns, and up to a late hour had only canvassed the votes from less than one-half of the chapters. For the various officers the count so far made shows the following to be in the lead:

For president, Samuel B. Donnelly, New York Typographical Union No. 6.
For first vice-president, James M. Lynch, Syracuse Typographical Union No. 11.
For second vice-president, William P. Smith, Washington Electrotypes' Union No. 11.
For fourth vice-president, W. G. Harber, Boston Maltsters' Union No. 1.
For sixth vice-president, Charles A. Allen, Boston Photo-Engravers' Union No. 1.
For secretary-treasurer, C. P. Connolly, St. Louis Typographical Union No. 2.
For agent Charles-Drexel Home, E. L. Canell, Lynn Typographical Union No. 18.
For trustees Charles-Drexel Home, David P. Boyer, Columbus (Ohio) Typographical Union No. 5.
For organizer, M. T. Burton, Memphis Typographical Union No. 11.
For delegates to the American Federation of Labor there are sixteen candidates in the field, and of these Messrs. Edward Hirsch of Baltimore, Frank Morrison of Chicago, Roy W. Secretary, and treasurer of that organization, and Shelby Smith of this city are in the lead.

here, and in every corner one may see a group of them—old schoolmates talking about old times and prophesying great things for each other when the fight begins.

It is at Key West, though, that one feels the real atmosphere of the war, rather than at Tampa. At Tampa, they are waiting for action. Here they have had it and have it almost every day. The crowd here is not so large, for the men have to stick to their ships and most of the vessels are in the blockading squadron. The boats come in every now and then, and the men who have been fighting gather the men who have been shot around them and tell them all about it. The talking grows loud and the air is full of excitement.

In one corner of the hotel are the men who have just come in after an engagement, and in the other are the men who are going out the next day to take their part. They are writing home to their wives and to how to do it if anything happens, and the postoffice is crowded with letters from home.

Of course everyone is trying to learn Spanish, and though not very much progress is reported, still many have found what "dos palabras" means. It is simply our old friend "two dollars," only it is not worth down here anything like what it used to be at home. The town is like all other small places in the South. It is extremely hot. The nights are always very hot, but there is no word too bad for you if you say anything against it. As a matter of fact, the place is not half so bad as it has been reported. The heat is not bad and not hard to stand. At night there is always a breeze, and one can sleep under a light cover.

The mosquitoes and bees are frightful. They have gone into combination with each other, according to a story, and the mosquito raises lumps on your body for the flea to play leap frog over.

The soldiers are very much interested in the townfolk from sleeping at night. They visit two or three places in town, and some very pretty girls take place every night. The fights are always very much interested, and next day it's all right. The aftermath of the San Juan bombardment shows a great many queer stories. The only man who still admit that he was in the fight is the cook of one of the dispatch boats. Some one handed him a pair of glasses to hold. When a shell came straight for the boat the cook was frightened almost to death. His idea was to throw himself overboard. But he wanted to have the glasses on board, so he drew himself down on the deck of the boat and threw the glasses overboard. He was a little, and was rather glad of it when it was all over. The cook, Capt. Allen, is the there in the side of all the correspondents. His idea was to throw himself overboard. But he wanted to have the glasses on board, so he drew himself down on the deck of the boat and threw the glasses overboard. He was a little, and was rather glad of it when it was all over.
